Bitcoin BR BEP20

Bitcoin BR (BTCBR) Whitepaper v1.0

1. Introduction

Bitcoin BR (BTCBR) is a decentralized financial asset developed on the BNB Smart Chain (BSC) network. It is designed to combine the store-of-value philosophy of Bitcoin with the high-speed and low-cost efficiency of the modern Binance ecosystem. BTCBR is a community-driven project that empowers users to participate in a transparent and secure financial environment.

2. Our Vision

Our vision is to build a robust community-based ecosystem where every holder has a voice. By leveraging the BSC network, we ensure that transactions are nearly instantaneous and affordable for everyone, everywhere.

3. Technology

BTCBR utilizes the BEP-20 standard, ensuring full compatibility with popular decentralized wallets like MetaMask, Trust Wallet, and SafePal.

- **Network:** BNB Smart Chain (BSC)
- **Standard:** BEP-20
- **Security:** Immutable Smart Contract

4. Tokenomics

The tokenomics of BTCBR are designed for long-term sustainability:

- **Token Name:** Bitcoin BR
- **Symbol:** BTCBR
- **Contract Address:** 0xef5B009Bd9402aB7fb52C87Cc9B0b5202636EE8b
- **Total Supply:** [Masukkan Jumlah Supply Anda]
- **Distribution:** Community-focused with liquidity locked to ensure safety.

5. Roadmap

- **Phase 1:** Branding, Website Deployment, and Social Media Community Launch.
- **Phase 2:** Liquidity Pool Activation on PancakeSwap and BscScan Information Update.
- **Phase 3:** Global Marketing Campaigns and Listings on major Price Aggregators (CoinGecko/CoinMarketCap).
- **Phase 4:** Strategic Partnerships and Ecosystem Expansion.

6. Disclaimer

Cryptocurrency investments carry high risks. BTCBR is a community project and does not provide financial advice. Users should conduct their own research (DYOR) before participating.
